Abstract

This research article aims to study the origins and significance of the Belt and Road Initiative or BRI. Including the extension of the project, Digital Silk Road or DSR The study of topics is based on Geopolitical, and the study reveals the dynamics of geopolitical concepts. along the way by studying through changes in technology.

The researchers found that the BRI and DSR is a project in response to China's global geopolitics. In a situation where China seeks to find a supply chain outside the country to maintain the supply of natural resources to drive the economy and to expand the Chinese market at the same time. The study also highlights geopolitical dynamics, that covers the area of technology in the form of a market. The goal is to reduce US influence on China, and Geopolitics over virtual space Establishing sovereignty over cyberspace which is a factor indicating the dynamics of geopolitical concepts through technology or Techno-Geopolitics.
